

G72 9 X 19mm COMPACT SMG

FEATURES

SSS Defence weapons have been engineered with the needs of the operator in mind. They are highly effective individual automatic weapons designed for special forces, army elements, and law enforcement personnel, and guarantee high quality, strength, and endurance. The G72 Compact SMG from SSS DEFENCE is a short-barrel modular submachine gun chambered in 9x19mm NATO, purpose-built for operations where space is limited and quick maneuverability is essential. With its 6-inch barrel, this compact variant is ideal for close-quarters battle (CQB), VIP protection, and vehicle-borne operations. Designed for both semi-automatic and full-automatic modes, the roller-delayed blowback system ensures controllable and accurate fire, even in full-auto. The barrel is available with chrome-plated or nitride-treated finishes for enhanced durability. The ambidextrous selector doubles as a safety lever, and the side-folding stock locks securely in both open and closed positions for better operational flexibility. The free-floating handguard supports integrated rails at 12 and 6 o'clock, and M-LOK slots at 3 and 9, allowing users to attach accessories such as sights, lasers, lights, and foregrips. Constructed from aerospace-grade aluminium and high-strength steel alloys, the G72 Compact is both lightweight and rugged. Integral backup sights, a muzzle brake, and threaded muzzle for suppressor compatibility come standard, making it a mission-ready compact weapon platform.

G72_{9 X 19mm}

COMPACT SMG

Model		G72 CSMG
Caliber		9 x19mm
Operation		Delayed Roller Blow Back System
