

G72 9 X 19mm **SUB MACHINE GUN**

FEATURES

SSS Defence weapons have been engineered with the needs of the operator in mind. They are highly effective individual automatic weapons designed for special forces, army element and law enforcement personnel and guarantee high quality, strength and endurance. The G72 from SSS DEFENCE is a versatile, modular submachine gun chambered for the 9x19mm NATO cartridge. It is a reliable, customizable weapon ideal for tactical use, VIP security, and close-quarters battle (CQB) scenarios. Allowing for operation in semi-automatic and full-automatic modes, the G72's roller-delayed blowback system ensures accuracy and control in full-auto fire. The G72 can be configured for different barrel lengths –7" 8.7" and a compact version, based on mission criteria. The barrel can also be offered with a chrome plating or nitride finish to the bore. The ambidextrous selector doubles as a safety lever and the side-folding stock locks securely in both positions. The free-floating handguard design aids heat dissipation, protecting the user's hands. With Integral Rails at 12 & 6, M-LOK Rails at 3 & 9 positions, the G72 supports various accessories like sights, lasers and grips. Constructed from aerospace-grade aluminium and high strength steel alloys, it's both lightweight and durable. Integral backup sights and a muzzle brake come standard, with the threaded muzzle allowing for easy suppressor attachment.

G72
