

# **T12** SEMI-AUTO **SHOTGUN**

## **FEATURES**

The T12 Semi-Auto Shotgun is a mission-ready tactical platform engineered for law enforcement and specialist units demanding reliability, control, and rapid response. Chambered in 12-gauge and employing a refined gas-operated system, the T12 delivers consistent cycling across a wide spectrum of ammunition—from low-recoil training loads to heavy breaching rounds—ensuring dependable performance in the field. Its 20-inch precision barrel with multi-choke capability provides tunable pattern control for close-quarters engagements and deliberate reach at extended distances. The compact 990 mm overall length and lightweight synthetic buttstock enhance maneuverability in confined spaces without compromising stability. Precision-machined components, an optimized recoil mitigation system, and corrosion-resistant finishes promote repeatable accuracy and long service life across urban, maritime, and extreme environments. Ambidextrous controls, ergonomic design, and a balanced profile enable instinctive handling and fast follow-up shots under stress. Integrated rail mounting supports optics, lights, and mission-specific accessories, making the T12 a modular tool for patrol, tactical entry, breaching, and VIP protection. Configurable magazine capacity and simple field-serviceability support sustained operations and rapid maintenance. Tested for durability and operational tempo, the T12 combines professional-grade engineering with practical versatility to give teams confidence when seconds count.
