

T72 7.62 x 51mm **ASSAULT RIFLE**

FEATURES

The VIPER AR is a 7.62x51mm NATO rifle engineered for precision, reliability, and adaptability in demanding environments. Utilizing a short-stroke gas piston system, it ensures smooth operation with reduced fouling, delivering consistent performance even under harsh conditions. The rifle is available with a 16-inch free-floating barrel, offering an optimal balance between manoeuvrability and accuracy, and is capable of firing in automatic mode. Its adjustable buttstock, featuring an adjustable cheek rest, enhances shooter comfort and stability during extended use. A muzzle brake, compatible with suppressors, helps manage recoil for improved control and faster follow-up shots. Constructed from lightweight yet durable aluminium receivers, the VIPER AR maintains structural strength without adding unnecessary bulk. With a 20-round magazine capacity, it provides sustained firepower, while the 3 lb trigger pull ensures crisp and precise shot placement. The MIL-STD-1913 handguard allows seamless integration of accessories, and the ambidextrous charging handle enhances operational efficiency for both left- and right-handed users. Designed for long-range engagements, overwatch roles, and tactical missions, the VIPER AR delivers exceptional accuracy, power, and versatility—making it a top-tier choice for marksmen and tactical professionals.
