

T72^{7.62 x 51mm} VIPER DMR

FEATURES

The VIPER DMR is a 7.62x51mm NATO rifle designed for precision, reliability, and adaptability in demanding environments. Utilizing a short-stroke gas piston system, it ensures smooth operation and reduced fouling, delivering consistent performance in harsh conditions. The rifle is available with 20", 24" free-floating barrels, giving shooters the flexibility to balance manoeuvrability with long-range accuracy. Its adjustable buttstock, featuring an adjustable cheek rest, enhances shooter comfort and stability, while the muzzle brake compatible with a suppressor helps manage recoil for superior control. Built with lightweight yet durable aluminum receivers, the VIPER DMR maintains strength without unnecessary bulk. Its 20-round magazine capacity ensures sustained firepower, while the 3lbs trigger pull enables crisp, precise shots. The MIL-STD 1913 handguard allows seamless accessory customization, and the ambidextrous charging handle enhances operational efficiency. Engineered for long-range engagements, overwatch roles, and tactical missions, the VIPER DMR delivers unparalleled accuracy, power and versatility-making it a top-tier choice for marksmen and tactical professionals.
